## Accredited Safeguarding Training and Specialist Support Services

All organisations with a responsibility for keeping children safe need to ensure that their staff and volunteers are able to access good quality safeguarding training. It's also essential that they keep up to date with all the latest developments and that the organisation itself can access specialist support to help develop their safeguarding practice.

We appreciate that the need to keep staff and volunteers sufficiently trained and up to date on the latest safeguarding issues can be challenging. The increasing amount of safeguarding guidance and legislation means that organisations are constantly having to keep themselves updated and they need to be able to adapt quickly to change.

Our Mentor service is the gateway to a wide range of safeguarding training and services that help organisations to meet these challenges. This package of support not only provides you with a choice of high-quality safeguarding training courses but also gives organisations access to other essential services. This approach allows you to access all of your safeguarding resources and specialist support in one place.
