

SENTRY®

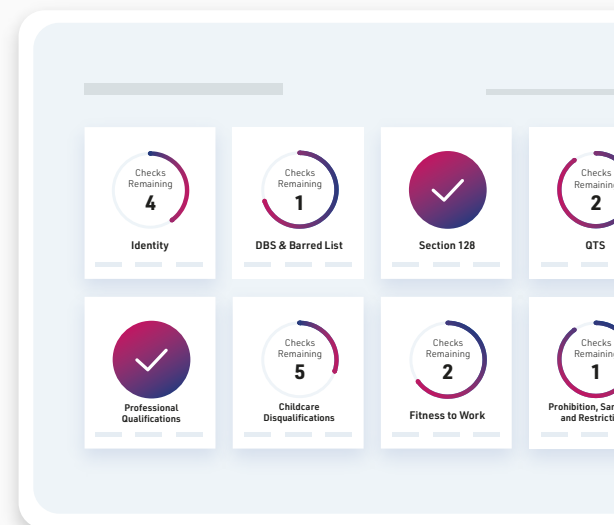

Effective Safeguarding starts with Safer Recruitment

All high performing organisations need to recruit the very best people, whether as staff, volunteers, contractors, governors or trustees but you need to know that these people are what they appear to be, especially if they are working with children or in other sensitive roles.

Sentry is a software tool designed to enable best practice in safer recruitment for organisations in any sector or setting. Sentry acts as a customisable solution for the secure recording of statutory and non-statutory checks for all staff and volunteers working across your organisation. In education settings Sentry is also your Single Central Record (SCR).

Keeping track of multiple checks with varying levels of requirements across all the members of an organisation has become increasingly complex and can no longer be managed efficiently or effectively by spreadsheets and paper records.

Sentry is your critical first line of defence against those individuals who may present significant risks to children, young people and adults at risk.

How can Sentry Help?

Sentry ensures that your recruitment process is robust by providing easy to follow workflows that track and record the progress of pre-employment checks.

The step-by-step guided workflows ensure no check is missed, saving time and giving peace of mind that your practices are compliant with current regulations and requirements.

Easy to read dashboards provide information at a glance to stay on top of statutory and time-sensitive vetting checks.

Sentry prioritises the safety of the people that you are required to protect in your setting.

For educators Sentry is your Single Central Record, providing a secure location for recording checks about staff, volunteers, contractors, governors, trustees and any other individual whose role requires them to be checked.

Sentry at a glance

- ✔ Enables compliance with statutory legislation and guidance from regulatory bodies
- ✔ Easily import your existing Single Central Record with a simple Excel template
- ✔ Quick reference dashboards to easily monitor status and outstanding recruitment checks
- ✔ Customisable checks and roles to tailor Sentry to the way your organisation works
- ✔ Expiry dates keep track of time-sensitive checks and notify when renewals are needed
- ✔ Automated workflows throughout the system ensure no critical steps are missed
- ✔ Minimises risk and facilitates a joined up safeguarding approach
- ✔ Custom deadline dates show when checks must be completed or actioned
- ✔ File upload feature allows important documents to be linked to personnel profiles
- ✔ Track safeguarding training with expiry dates.

Total Safeguarding

Sentry is a key element of our wider suite of safeguarding software solutions - MyConcern® for recording, case management and data reports, Clarity® for multi-establishment safeguarding and Confide® for recording concerns about staff, while Mentor® is the gateway to our CPD-certified safeguarding training courses and other services.

This combination of the very best safeguarding technology and practice, backed up by world class customer service is what helps our customers to achieve 'Total Safeguarding'.

"This innovative tool will ensure that not only are you compliant with the statutory guidance but you are also much more efficient."

Luke Ramsden, DSL and Deputy Headteacher
St Benedict's School
